TWITTER BOT PROJECT

How can we get a computer to say something tweet-worthy?

RON PAUL SAID WHAT?

This reality secrecy is fundamentally wrong with whatever industry or activity they are thinking only of political parties compete for power.

What currency are your thoughts on abolishing America's income tax altogether and get others to look into our private communications?

New crime government programs and spiderwebs of red tape really solve anything.

ITERATIVE STEPS

Randomly generate words from a dictionary

Collect a corpus and analyze word frequency

Sample words from a Markov grammar model

Make Flask web app and deploy to Heroku

Connect to Twitter API to tweet sentences

PROJECT GOALS

Python scripting and web app development

Natural language processing

Probability and Markov models

Data structures and performance analysis

Regular expressions

WHAT TO FOCUS ON

Python programming proficiency

Familiarity with tools and libraries

Understand tradeoffs for data structures

Write clean code – make it maintainable

Level up your level of understanding
